

## Ideation Phase

### Brainstorm & Idea Prioritization Template

Date: 3 November 2025

Team ID: NM2025TMID07720

Project Name: CRM Application for Jewel Management (Developer)

Maximum Marks: 4 Marks

#### CRM Application for Jewel Management Template:

This project demonstrates how to manage and automate jewelry business operations using a CRM system. It focuses on solving problems such as unorganized customer data, manual billing processes, and difficulty tracking inventory. The CRM application provides modules for customer management, sales tracking, and inventory monitoring. It enables the store to personalize communication, maintain customer loyalty, and improve decision-making through reports and analytics.

The workflow includes the creation of customer records, sales orders, and automatic stock updates after every transaction. The system also ensures timely reminders for customer follow-ups, automated invoice generation, and insights into sales trends. This solution helps jewelry businesses streamline operations and improve customer satisfaction.

#### Step-1: Team Gathering, Collaboration and Problem Selection:

The team gathered to discuss various operational challenges faced by jewelry businesses. After evaluating multiple pain points, the team selected the need for a CRM system that integrates inventory management, customer relationship handling, and sales automation as the main problem to address.

#### Step-2: Brainstorm, Idea Listing and Grouping:

Fig2: Image that describes the work done by teammates.

##### Brainstorm:

Team members contributed creative ideas to address jewelry business challenges such as customer data tracking, sales automation, and stock management.

##### Idea Listing:

All ideas were recorded, including:

- Real-time inventory tracking
- Automated billing system

- Loyalty program and rewards tracking
- Customer purchase history insights
- Personalized promotional reminders

#### Grouping:

The ideas were grouped into three main categories: Inventory Management, Customer Relationship, and Sales Automation.

#### Action Planning:

The chosen ideas were broken down into steps such as module development, testing, and deployment. Responsibilities were distributed among team members with specific deadlines.

#### Step-3: Idea Prioritization:

Fig3: Image showing the steps for CRM implementation in jewelry management.

Idea prioritization helps the team focus on the most valuable features to implement first. In this CRM project, the primary focus is on automating customer management, inventory tracking, and billing systems. These features provide the highest impact on jewelry business efficiency and customer satisfaction.

By prioritizing ideas, the team ensures that critical modules like real-time stock management and sales tracking are developed before optional features such as AI-based recommendations. This structured prioritization allows smoother project execution and effective feature integration.

Overall, idea prioritization strengthened project clarity, improved collaboration, and helped align the development process with the business objectives of jewelry management.
